FOR POSTAL SAVINGS BANKS.

Postmaster General Gary Recom-mends They He Established. WASPINGTON, Nov. 14.-The first annual report of Postmaster General Gary was made whose book on "Money and Banking" has at- public today. Lis feature was the strong advocacy of postal savings depositories as a scheme upon which the postmaster general has worked for several months over the formulations to be presented to the president and congress. He recommends that the adoption of a well organized system would confer a great boon upon a large number of people and ultimately be of inestimable benefit to

Following is an abstract of the report.

The increase of the postal deficit for 1897 is largely a reflection of the depressed business conditions which prevailed all over the United States the first three quarters of that period. There has been no extravagance of expenditures, save that obligated by law.

"If this were done there would be an end to postal deficits and the service could be Question—For the purpose of facilitating the use of existing silver currency, what do you recommend as the smallest denomination of United States notes and bank notes which desired reduction of letter postage to 1 cent

More than 1,000 postal savings accounts in European offices are held by minors, and over two-thirds by those of the most humble callings. It is cosentially the tank of this class. Does not every honest man know that if the Citizens' union had gone into the proposed conference united action would have been inevitable? Is it not plain enough that the republicans could not possibly have broken up or have allowed to be broken up a conference which they themkept loof until a lasso had been obtained and the anaconda finally made secure.
